

MAKE A WEE **BANNOCKBURN** HOUSE

Use this kit to make your own model and to get to know features and materials of the house. The model template is based on drawings of the house made in the 1800s before the porch and rear extension were built. The scale of model is 1:200, i.e., 1cm on the model equals 200cm/2m on the real building.

HOW TO MAKE YOUR MODEL

Print out the drawings on A4 paper, one drawing per sheet. Standard printer paper is fine. You could also try thin card (200gsm). If you want to create a model double the size, select A3 paper size and 200% in your printer settings.

Decorate the five drawings. You could use colouring pencils, crayons, felt pens, paint or glue, fabric and glitter. Decorate your model to look like the real house or to recreate the illuminations or with your own designs.

Cut out each drawing by following the **solid, thick lines** using sharp, pointed scissors or a craft knife. Remember to cut round the dormers on the east, west and south elevations, so they pop up from the roofs. If you find the crowsteps too fiddly, cut a straight line alongside them instead.

Fold along the dotted lines. Fold so that the dotted lines are always visible on the outside of the model. You can use a ruler to make the folds crisper.

Stick and construct using glue or tape on the tabs. Follow the letters on the tabs from drawing 1 to drawing 5 to assemble your model. Stick the tabs to the inside of the model. To help you construct the model, turn it on to its sides if needed.

MAKE A WEE **BANNOCKBURN** HOUSE

DESCRIBING THE BUILDING

FEATURES

- h-shaped plan
- central block and wings
- symmetrical south elevation
- pitched roofs
- crowstepped gables
- dormers with strapwork decoration
- sash and case windows
- door with pediment and columns

MATERIALS

- slate roofs
- lime-wash rendered walls
- sandstone dressings
at crowsteps, dormers and
around doors and windows
- wooden, 12-paned windows
